Permanent address

Harcharan Singh Dhaliwal, FNAAS
House No.1523
Sector 32-A
Chandigarh Road, Ludhiana 141010
Punjab, India

Date of birth: March 1, 1946.

Academic Qualifications:

Ph.D. 1972-75. Genetics, University of California, Riverside, California, USA. OGPA 3.78/4.00.

M.Sc. (Hons.) 1967-1969 Plant Breeding; Punjab Agricultural University, Ludhiana, India. OGPA 3.91/4.00.

B.Sc. 1963-1967 (Agric.), Panjab University, Chandigarh, India. Second position in the University.

Matriculation 1962, Panjab University, Chandigarh, India (Obtained 71.18% marks).

POSITIONS HELD AND RESEARCH EXPERIENCE

Vice-Chancellor, Eternal University, Baru Sahib, Himachal Pradesh since August 14, 2013.

Organized two convocations for the year 2013 and 2014. Started new programmes in B. Sc.(Hons) Ariculture, B. Tech. Food Technology, Electronic and Electrical Engineering, M. Tech. Renewable Energy. **Organized a national symposium “Applications of Recent Advances of Biotechnology for Crop Improvement” at Baru Sahib on July 12, 2014.** Chaired a meeting of the newly constituted Expert Committee on Crop Molecular Breeding” of Department of Biotechnology, Govt. India July 9-11, 2014, at Baru Sahib and Centre of Excellence in Innovative Biotechnology at PAU, Ludhiana on March 4, 2015. Compiled Students Hand Book of the Eternal University containing all the rules and regulation from the admission in an undergraduate programme to the award of Ph. D. **The Eternal University has been rated as the best Private University in Himachal Pradesh for girl studends and diversity of courses offered by Seasonal Magazine.** Received and implemented research and infrastructure development grants from DBT, Ministry of Science & Technology, and Ministry of Food Processing Industry, New Delhi. Developed and streamlined rules and regulations for attraction and retention of best faculty from India and abroad. Got associated more than 30 distinguished Non-Resident Indian Professors from advanced institutions abroad as **Adjunct Professors for transfer of Technology and training faculty and students.**

Distinguished Professor Biotechnology-Cum-Dean, Akal School of Biotechnology, Eternal University, Baru Sahib, Himachal Pradesh. March 1, 2011 onwards. Biofortification of wheat for enhanced grain iron and zinc through wide hybridization and precise transfer of useful variability from related wild species. Molecular breeding of important functional food crops of India and their value addition. Bioprospecting and value addition of important medicinal plants of Himalayas for their nutraceutical potential and sustainable use of their biodiversity.

Professor of Biotechnology, Department of Biotechnology, Indian Institute of Technology Roorkee, Roorkee, Uttarakhand. November 20, 2003 to February 28, 2011. Introgression of genes of economic importance from wild relatives of crop plants, molecular cytogenetics and genomics of crop and medicinal plants. Biofortification of wheat for higher grain micronutrients and protein content. Molecular breeding of Basmati rice.

Professor of Biotechnology and leader of Introgression and molecular breeding unit of Department of Genetics and Biotechnology. February, 2000 to September 30, 2003. Introgression of useful variability from related wild species of wheat and rice, molecular characterisation of useful derivatives, molecular mapping, gene tagging and pyramiding, map and insertional mutagenesis based gene cloning, genetic transformation and characterisation of transgenic plants.

Founder Director/Head, Biotechnology Centre, PAU, Ludhiana. February 1992 to February 2000. Strengthened Biotechnology Centre. Formulated and got funded a number of research projects from national and international agencies including Rockefeller Foundation, US-Indo-Fund, DBT, NABARD, ICAR, DST, Asian Rice Biotechnology Network. Formulated 12 new courses for offering Biotechnology as a field of specialization to 13 different departments. Established laboratories and green house facilities for large-scale micropropagation of plants, genetic transformation, wide hybridization and molecular mapping.

Visiting Scientist, Applied Biotechnology Centre, CIMMYT, Mexico. August to October 1999. Molecular tagging of Karnal Bunt resistance genes of wheat using AFLPs and microsatellite markers.

Rockefeller Foundation Career Fellow, Institute of Molecular and Cellular Biosciences, University of Tokyo, Japan, three months each year from 1996 to 1998. Genetic transformation of Basmati rice with maize Ac, Ds transposons for gene cloning using *Agrobacterium tumefaciens* system. Molecular gene characterization of transgenic plants

Visiting Professor, Weizmann Institute of Science, Rehovot, Israel, April-May, 1997. Genetic transformation of wheat for Dalapon resistance using particle bombardment gun and *Agrobacterium tumefaciens*.

Visiting Professor, Kihara Institute for Biological Research, Yokohama, Japan, September, 1996, 1997. Cytological and molecular characterization of interspecific derivatives of wheat with disease resistance from *Ae. triuncialis* and *Ae. ovata*.

Visiting Scientist, Division of Plant Industry, CSIRO, Canberra, Australia, August-Sept. 1994. Genetic transformation of rice and wheat using particle bombardment. Production of haploids using wheat x maize crosses

Professor of Biotechnology, Department of Plant Breeding, PAU, Ludhiana. Sept.1990 to Feb. 1992. Established Biotechnology Centre at the PAU and formulated research programme in plant biotechnology.

Associate Director Research Zone II, PAU, RRS, Gurdaspur. February 1990 - September 1990 (Full time) and September 1990 - November 1991 (Additional charge). Successfully implemented the World

Bank aided National Agricultural Research Project for Zone II of the State.

Senior Scientist-cum-Director (Professor) PAU Regional Research Station, Gurdaspur. April 1985 to Feb. 1990. Guided agricultural research and extension activities of multidisciplinary teams for developing high yielding and disease resistant varieties of field, fruit and vegetable crops and development of package of practices for agroclimatic zone II of Punjab

Visiting Professor, Department of Plant Pathology, Kansas State University, Manhattan, Kansas, USA. Feb.1989 to June 1989. Developed a series of D genome addition lines in *T.durum* using C-banding; Characterized *Agropyron elongatum* and *Agropyron intermedium* chromosome segments carrying resistance to wheat streak mosaic virus.

Senior Research Fellow, CIMMYT, Mexico. Feb. to June 1987. Discovered a number of missing links in epidemiology and completed the life/disease cycle of Karnal bunt disease of wheat.

Research Fellow, Friedrich Miescher Institute, Basel, Switzerland. Jan.1977 to May 1979. Developed biochemical system for selection of immature haploid embryos of maize and embryogenic haploid calli for *in vitro* mutagenesis and genetics studies, investigated *in vivo* and *in vitro* maize x sorghum intergeneric hybrids, histological investigations of organogenesis of embryogenic cultures of sorghum.

.D.F. Jones Postdoctoral Fellow, Department of Plant Sciences, University of California, Riverside. July 1975 to Dec.1976. Synthesized numerous amphiploids in Triticeae, established *T.urartu* as one of the parents of tetraploid wheat; analyzed seed storage protein diversity in Triticeae and its genetic control.

Research Assistant (Part-time), Department of Plant Sciences, University of California, Riverside. Sept.1972 to June 1975. Classified wild wheat collection of Dr. B.L Johnson using seed protein electrophoresis, cytology, interspecific hybridization and anther morphology. Discovered *Triticum urartu*, a new species of diploid wheat.

Research Assistant, Punjab Agricultural University, Ludhiana. Aug. 1969 to Sept. 1972. Developed disease resistant and high yielding varieties of pulses including *Cicer arietinum*, *Vigna mungna*, *Vigna radiata*, *Lens esculentum* and *Pisum sativum*.

Awards and Fellowships:

Received Merit-cum-Means scholarship from ICAR from 1963-1967.

Awarded Junior Fellowship ICAR from 1967-1969.

Research Assistantship of University of California from 1972- 1975.

D.F.Jones Post-doctoral Fellow, University of California from 1975-1976.

Senior Research Fellow, CIMMYT, Mexico, 1987.

Visiting Professorship, Department of Plant Pathology, Kansas State University, Kansas, USA, 1989.

Selected National Fellow by ICAR in 1983 but did not join.

Cash award from Federation of Indian Chambers of Commerce and Industry in 1985.

Pesticide India Award from Mycology and Plant Pathology Society of India 1988.

Fellow, National Academy of Agricultural Sciences, India, 1992.

Member, International Advisory Board, Wheat Information Service, Yokohama, Japan

Rockefeller Foundation Career Fellowship, University of Tokyo, Japan, 1996-1998.

Visiting Professor, CIMMYT, Mexico, 1999.

Cochran Fellowship by United States Department of Agriculture, September, 2001 and October, 2003 to review the US work on GMOs and their public acceptance and biosafety.

Membership of Scientific Societies, Task Forces and Committees:

- Indian Society of Genetics and Plant Breeding.
- Society for Plant Biochemistry and Biotechnology.
- Crop Improvement Society of India.
- Member, Editorial Board, Indian Journal of Agricultural Sciences, ICAR, 1997-2000.
- Member, Task Force, Biotechnology, Department of Biotechnology, Ministry of Science and Technology, Govt. of India, New Delhi. 1997-2000.
- **Member, Agricultural Biotechnology Task force, Department of Biotechnology, Ministry of Science & Technology, Govt. India, New Delhi. 2006-09. Attended recent meeting from June 24-26, 2010 at Department of Agricultural Botany, AAU, Jorhat.**
- Member, Expert Group, Monitoring and Mentoring and Expert Teams of Department of Biotechnology, Ministry of Science & Technology, Govt. of India for strengthening biotechnology research capabilities in State Agricultural Universities, . 2006 onwards.
- Member Editorial Board as Executive Editor of The Indian Journal of Crop Science of The Royal Society of Crop Science, Meerut, India, 2006 onwards
- Chairman, Project Monitoring committee for Wheat Quality Breeding, Department of Biotechnology, Ministry of Science & Technology, Government of India, December 2007 onwards
- Member , Expert Committee on Biotechnology and Biosafety, National Biodiversity Authority, Chennai, January, 2008
- Member , faculty of Inter-disciplinary and Applied Sciences, University of Delhi, South Campus, New Delhi, February 4, 2008 onwards.
- Member Expert Committee of DBT for July 7, 2008.
- Member Expert Team DBT to visit Anand Agriculture University, Anand, Gujrat for “Programme Support for R&D in Agricultural Biotechnology” June 20, 2008.
- Member of An Expert Committee of DBT on “Application of molecular markers for improvement of crop plants under Grand Challenge Programme”September 15-16, 2008.
- Member “Project Monitoring Committee in Agri-Biotechnology” of DBT of projects sanctioned under the scheme “Centre of Excellence/ Programme Support in Biotechnology” July 1, 2008. Met from November 7-8, 2008 at UAS, Bangalore.
- **Member of the Research Advisory Committee of Indian Agricultural Research Institute, New Delhi constituted by ICAR for a period three years from 25.6.2008 to 24.6.2011. Met from November 19-21, 2008 at IARI, New Delhi. Attended second meeting on August 9-10, 2010 at IARI, New Delhi.**
- Chairman Project Monitoring Committee of DBT for “Wheat Quality Network Projects” October 18, 2008 at Pune.
- Member Expert Committee of Department of Biotechnology, New Delhi under Grand Challenge Programme from 2008 onwards. Met at Directorate of Oilseeds Research at Hyderabad from

December 16-17, 2008.

- Member Technical Advisory Committee(TAC) for implementing the scheme “Centre of Excellence and Innovation in Biotechnology(CEIB” of DBT, Govt. India for three years from 15.05.2009. Attended the second meeting at ICRISAT, Hyderabad on September 6-7, 2009. Attended third meeting at IISC, Bangalore from March 8-9, 2010. Attended 4th meeting on July 12-13, 2010 at DBT, New Delhi. Attended third meeting on July 30-31, 2010 In the Department of Botany, University of Kolkata and then at DBT, CGO Complex, New Delhi on December 15, 2010. Attended its Fifth meeting from June 14-15, 2011 at DBT, New Delhi. Attended its Sixth meeting from June 21-22, 2011 at DBT, New Delhi. **Attended the 7th meeting on May 9-10, 2012 at the Department of Biotechnology, CGO Complex, New Delhi.**
- Member Fast Track Agri-Biotech and Review and Approval Committee for considering important mega projects in the area of Agricultural Biotechnology from August 25, 2009 onwards. Attended the first meeting on September 3, 2009 at the National Institute of Plant Genome Research, New Delhi. Attended second meeting on August 17, 2010 at IPGR, New Delhi. Attended third meeting on September 10, 2011 at NIPBR, New Delhi.
- Expert member for the DBT-FICCI Industrial Platform meeting in the area of Agricultural Biotechnology held on 02.09.2009 at DBT, CGO Complex, Lodi Raod, New Delhi.
- Member Programme Management Committee (PMC) of DBT for Accelerated Crop Improvement (ACIP) till completion of the projects (April 21, 2010). Attended two PMC meetings at IARI, New Delhi, ICRISAT, Hyderabad, October 27-28, 2010, PAU, Ludhiana, September 29-30, 2011 **and Directorate of Sorgum Research , Hyderabad on June 28-29, 2012.**
- Member Expert Committee for technical evaluation of Sponsored/Competitivr Grants Components under the new Plan Scheme on “National Initiative on climate Resilient Agriculture”(NICRA) launched by ICAR on 02.02.2011. Attended the Third meeting at CRIDA, Hyderabad, June 19-20, 2011 and Fourth meeting on August 4, 2011 at Krishi Anusndhan Bhavan-II, Pusa Complex, New Delhi. Attended 8th meeting at CRIDA, Hyderabad from December 21-22, 2013.
- Co-Chairman of a newly constituted TASK FORCE ON CROP BIOTECHNOLOGY of Department of Biotechnology, Government of India vide notification No BT/AB/TF/Recon/2011 dated July 26, 2011 with 18 other members. Attended and chaired its first meeting from August 23-24, 2011 at Tamil Nadu Agricultural University, Coimbatore. Attended 2nd meeting at DSR, Hyderabad from December 27-29, 2011.
- Member Research Advisory Committee of National Research Centre Plant Biotechnology, Pusa Campus of ICAR, New Delhi. Attended its First meeting on March 12, 2012 at NRCPB, New Delhi and the last meeting on April 15, 2014 at NRCPB, IARI, New Delhi.
- Member of a newly constituted (October 10, 2011) Project Advisory and Monitoring Committee(PAMC) of Department of Biotechnology, Govt. India for the review/monitoring of multi-centric network R&D on Wheat Genomics and Puccinia Genomics Projects. Attended its first meeting at 10:00AM on 27th April, 2012 at NRCPB, Pusa Institute Campus, New Delhi and the second meeting at PAU, Ludhiana in 2013.
- Chairman of a newly constituted Expert Committee on Crop Molecular Breeding of Department of Biotechnology, Govt. India, New Delhi (BT/AB/CMB/01/2014). Its first meeting was held at the Eternal University, Baru Sahib from July 9-11, 2014.
- Member Apex Committee in Agriculture Biotechnology of Department of Biotechnology, Govt. India, New Delhi(BT/AB/AC/01/2014) to consider and monitor major and network projects in Agriculture Biotechnology.
- Chairman of a newly constituted “Projet Monitoring Committee in Agri-biotechnology” of Department of Biotechnology, Govt. India, New Delhi (DBT/01/CEIB/14 dated 22.05.2014). It first meeting was held in the Department of Plant Breeding, Punjab Agricultural University, Ludhiana on March 4, 2015 and chaired by me.

Participation in Conferences/Seminars/Workshops/Symposia:

International Congress of Genetics, University of California, Berkeley, DAVIS, 1973.

Annual Meeting, American Society of Genetics, University of Utah, Salt Lake City, 1975.

Conversazione on Wheat, University of Missouri, Columbia, USA, 1976.

Round Table Discussion on Plant Tissue Culture, Friedrich Miescher Institute, Basel, Switzerland, 1977.

International Congress of Genetics, Moscow, USSR, 1978.

Allerton House Meeting of Corn Geneticists, University of Illinois, Urbana-Champaign, USA, 1979.

Plant Breeding Symposium II, Ames, Iowa, USA, 1979.

Invitation from a Plant Tissue Group, University of Southern Paris, Orsay, France, 1979.

Attended International Congress of Genetics, New Delhi, India, 1983.

Visited Tissue Culture Centre for Crop Projects, Fort Collins, Colorado, July 1987.

Visited Plant Breeding Institute, Cambridge, England and delivered a seminar on Karnal bunt disease of wheat, July 1987.

Attended nine different Annual All India Wheat Research Workers' Workshops held at various places in India since 1979.

Attended Stadler Genetics Symposium, University of Missouri, Columbia, March 13-15, 1989.

Attended International workshop on Evaluation and Utilization of Biodiversity in wild relatives and Primitive forms for wheat Improvement. ICARDA, Aleppo, Syria, October 12-15, 1992.

Attended Sixth Annual Meeting of the International Rockefeller Foundation Program on Rice Biotechnology, Chiang Mai, Thailand, February 1-5, 1993.

Attended a Study Meeting on Biotechnology Application in Agriculture from 18-28 January 1994 in Tokyo which was sponsored by National Productivity Council, India, Asian Productivity Organization, Tokyo and Ministry of Agriculture, Fishery and Forestry, Japan.

Attended 7th Annual Meeting of International program on Rice Biotechnology, Bali, Indonesia, May 1994.

Attended Third International Rice Genetic Symposium, Manila, Philippines, October 1995.

Attended 5th Annual meeting, National Rice Biotechnology Network, Nov.13-16, 1996. ICGEB, New Delhi.

Attended 2nd International Crop Science Congress. 17-24 November, 1996, New Delhi.

Convenor, Biotechnology Session, Third Agricultural Science Congress by National Academy of Agricultural Sciences, March 12-15, 1997, PAU, Ludhiana.

Delivered invited lecture Breeding for resistance to bunts and smuts diseases of wheat: Indian Scenario at the

Bunts and Smuts of Wheat: International Symposium organized by USDA, North Carolina, August 16-21, 1997.

Attended International meeting on Rice Biotechnology at Malacca, Malaysia organized by Rockefeller Foundation and MARDI, September 15-20, 1997.

Attended the 12th Toyota Conference "Challenge of Plant and Agricultural Sciences to the crisis of Biosphere on the Earth in the 21st Century", Mikkabi, Shizuoka, Japan, Nov.25-28, 1998 and Chaired a Session on Improvement of Plant functions with Conventional Methods and Biotechnology.

Attended Inaugural Symposium of Indo-Swiss Collaboration in Biotechnology organized by DBT and SDC at Indian Habitat Centre, New Delhi February 12-13, 2001 and delivered the invited lecture.

Reviewed the Chinese UNDP funded project on inactivation of Karnal bunt teliospores using electron bombardment at the Tsinghua University as an international expert in May, 2001.

Attended Annual meetings of Indo -Swiss Collaboration in Biotechnology in February 2001, February, 2002 and March, 2003 at Delhi, Pune and Delhi, respectively.

Attended Indo-US Agricultural Biotechnology Conference on Nutritional enhancement and Abiotic stress tolerance at Delhi from May 15-17, 2003.

Attended Indo-US Workshop on Research & Development in Genomics covering Health, Agriculture and Industry at Bangalore, September 7-10, 2003.

Attended Interactive Workshop on **Crop Biofortification for Alleviating Micronutrient Malnutrition** held at M. S. Swaminathan Research Foundation, Chennai from August 23-24, 2004 and chaired a session on Micronutrient deficiency-problems and solutions.

Visited Okayama University, Research Institute for Bioresources at Kurashiki, Tottori University, University of Tokyo and Kihara Institute for Biological Research, Yokohama in Japan from November 23-30, 2004 and delivered an invited lecture on **Wild germplasm of wheat: A mine of useful variability for food and nutritional security** at the Wheat and Barley Symposium at Tottori University.

Attended workshop on "**Food and Feed –Nutrition, safety and improved use of raw materials**" under Indo-Danish Bilateral Programme at University of Hyderabad, Andhra Pradesh, India from January 29-31, 2007 and presented a paper entitled "**Biofortification of wheat for micronutrients and protein content and bioprospecting of plants and microbes**".

Attended an international symposium "**Molecular Basis of Plant Breeding**" at CCS University, Meerut, India from February 26-28, 2007 as its **Chief Guest** and delivered a Keynote address on **Molecular Plant Breeding : An overview**.

Attended International **Annual Meeting of Crop Biofortification Programme of India and HarvestPlus** at the Indian Agricultural Research Institute, NASC complex , New Delhi, March 19-20, 2007 and **Chaired the session on Wheat Biofortification**.

Visited Kansas State University, Manhattan, Kansas, USA from June 26-29, 2007 and delivered a seminar on "**Biofortification of wheat for high iron and zinc micronutrient content using conventional and molecular breeding techniques**" in the Department of Plant Pathology.

Attended Third Annual Interactive Meeting on **Crop Biofortification for Alleviating Micronutrient Deficiency** at M. S. Swaminathan Research foundation, Chennai, India, February 22-23, 2008 and presented the progress report of IIT Roorkee Centre.

Organized and attended National Symposium on **Advances in Biotechnology Research for Crop Improvement and food Security**, SVBP University of Agriculture & Technology, Meerut, March 6-7, 2008, chaired a session and delivered a Plenary Lecture “Application of Biotechnology for Plant Improvement. Souvenir and Abstracts: 1-9.

Visited the Wheat Genomics work at Washington State University, Pullman, Washington, USA from July 21-22, 2008 and discussed various issues of wheat genomics and biofortification with the faculty.

Visited Agriculture and Agri-Food, Canada Research Station at Lethbridge, Alberta and gave a talk on “**Progress and Prospects of Germplasm Enhancement of wheat for ensuring Food and Nutritional Security**”. July 23-24, 2008.

Attended Workshop on **Biosafety issues related to practicing Agricultural Biotechnology** at GBPUAT University of Agriculture & Technology, Pantnagar, November 3-4, 2008. Delivered an invited lecture “**Challenges faced by farmers in northern India and their mitigation through biotechnological interventions**”

Attended **National Symposium on Biotechnology: Vision 2020** at SVBP University of Agric. & Technology, Meerut December 8-9, 2008. Chaired a session and delivered an invited lecture “Genomics and Plant Molecular Breeding” and participated in panel discussion.

Attended **Indo-Chinese Bilateral Workshop on Plant Genomics and Quantitative Genetics** at Ch. Charan Singh University, Meerut from 14-16 February, 2009 and delivered an invited lecture “Overcoming yield barriers in crop plants: Resolution and manipulation of quantitative trait loci” Programme & Abstracts pp20-21. Panelist at the Wrap-Up session.

Attended **International Wheat Quality Conference-IV “Wheat Science Dynamics: Challenges and Opportunities”** from June 2-6, 2009 at Saskatoon, Saskatchewan, Canada. Delivered a lecture “**Development and characterization of wheat-Aegilops amphiploids and interspecific derivatives with high grain iron and zinc content**” Co-chaired a session on **Food Safety and Security** on June 4, 2009.

Visited Salk Institute for Biological Studies, La Jolla, California, USA, July 16-17, 2009 and had discussion with the Plant Cell and Molecular Biology groups of Dr. Chory and Dr. Ecker.

Visited labs of Professor Giles Wainman and Prof. Adam Lukaszewski, Department of Botany and Plant Sciences, University of California, Riverside, California, USA on July 2, 2009 for exchange of views and materials for wheat improvement.

Visited laboratories of Prof. S. Rothstein of Department of Molecular and Cellular Biology, College of Biological Sciences and Dr. P. Pauls Associate Dean Ontario Agricultural College, University of Guelph, Guelph, Ontario, Canada June 8, 2009 and August 7, 2009, respectively and had discussions with scientists and students on the ongoing work and possible collaboration.

Attended **1st Indian Agricultural Scientists and Farmers Congress “Technological Innovation for Enhancing Agriculture Production”** on October 3-4, 2009 at CCS University Meerut and presented an invited paper “Keeping the Green Revolution Evergreen through recent advances in Biotechnology” Souvenir & Abstracts pp. 13-23.

Attended International seminar “**Meeting Challenges of Global Wheat Production : A Tribute to Dr. Norman E. Borlaug**” organized by Indian council of Agricultural Research, New Delhi at NASC Complex from November 21-22, 2009 and delivered an invited lecture, “**Breaking Yield Barriers in Wheat Productivity Through Wide Crosses**” in Technical Session III.

Visited Indian Institute of Technology, Guwahati, Assam, India from November 18-20, 2009 and delivered an Invited lecture “**Application of Molecular Tools for Overcoming Yield Barriers in Crop Plants**” at the DBT Program Support Project sponsored short term course(16th to 21st November, 2009) **Application of Molecular Tools for Crop Improvement.**

Attended a BBT Workshop on “**Molecular marker-assisted breeding for crop improvement**” at the Indian Agricultural Research Institute, New Delhi on December 15-16, 2009 and co-chaired a session with Prof. P. K. Gupta

Attended National Conference “**Bioprospecting: Access for Sustainable Development**” at Motilal Nehru National Institute of Technology, Allahabad from February 19-20. Delivered an invited lecture “**Progress and prospects of utilization of wheat germplasm for ensuring food and nutritional security**” and chaired a session.

Attended National symposium “**Genomics and Crop Improvement: Relevance and Reservations**” at Acharya N. G. Ranga Agricultural University, Hyderabad on February 25-27, 2010. Delivered an invited lecture “**Overcoming yield barriers in wheat by discovery and exploitation of new QTL for yield and yield components**” and chaired a session on Molecular Breeding.

Attended **National Congress on Emerging Trends in Agricultural Research** at Project Directorate for Farming Systems Research, Modipuram, Meerut on September 11-12, 2010 and delivered an invited lecture “**Progress and Prospects of Improvement of Nutritional Quality of Wheat Through Biotechnological Approaches**” Souvenir & Abstracts pp 186-187.

Attended Zonal seminar “**Physiological and molecular interventions for yield and quality improvement in crop plants**” at SVBP University of Agriculture & Technology, Meerut from September 17-18, 2010. Delivered an invited lecture “**Breaking yield barriers in wheat through QTL manipulations**” and chaired a session.

Attended a brainstorming session “**Prioritization and value addition of nutritionally important crops**” organized by National Academy of Agricultural Sciences at NASC, IARI, New Delhi on September 18, 2010 and delivered a lecture “**Progress and prospects of biofortification of micronutrients and their bioavailability in cereals**”

Attended a workshop “**Strategic planning and partnering for durable rust resistance in wheat**” organized by Borlaug Global Rust Initiative, DBT and ICAR from October 19-20, 2010 at NASC Complex, Pusa, New Delhi.

Attended 2nd **National Workshop on Marker –Assisted Selection for Crop improvement organized by DBT, GCP and ICRISAT at ICRISAT, Hyderabad** from October 27-29, 2010 and chaired a session “**Molecular breeding : Opportunities and challenges in orphan and vegetable crops**”

Attended **Indo-Canada Strategic Meet: Vision & Partnerships for Innovation in Agri-Food Research at the Agri-Food Cluster, NABI, Mohali** from November 22-25, 2010.

Attended a meeting on “**Crop Biofortification Research and Development**” organized by HarvestPlus-ICAR-DBT from February 7-9, 2011 at NASC, New Delhi as an expert and chaired the inaugural session

and gave advisory remarks.

Attended a **Wheat Biofortification Meeting on April 2, 2011 at ICRISAT organized by HarvestPlus** on behalf of Department of Biotechnology, Govt. India as an expert and shared my views and progress on wheat biofortification in India.

Attended a meeting of **Selection Committee of Agricultural Scientists Recruitment Board** on June 27, 2011 as its **Adviser** for the selection of Head, Division of Genetics, IARI, New Delhi.

Attended a meeting as a member of a committee constituted by the VC of CU, Punjab for finalization of **syllabus of M. Sc., M. Phil. and Ph. D. Integrated Programme in Biosciences of Central University of Punjab** at its administrative Block, Bathinda, Punjab on July 25, 2011.

Attended a conference “**Development and use of Molecular Markers for Crop Improvement**” organized by Indo-US Science and Technology Forum at NASC Complx, New Delhi from October 29-31, 2011 and delivered an invited lecture” **Introgression and identification of orthologs controlling high grain iron and zinc in wheat and other cereals using molecular markers, GISH and comparative mapping**”

Visited Shoolni University, Solan , Himachal Pradesh on November 13, 2011 and delivered an invited lecture “**Molecular markers, mapping and molecular Breeding**” at a Training –cum- Seminar in Molecular Biology Techniques” organized by Faculty of Biotechnology and sponsored by Department of Biotechnology, Govt. of India.

Visited ICRISAT, Hyderabad on November 17-18, 2011 and delivered an invited lecture “Overcoming Yield Barriers in Cereal Crops Through Introgression and Manipulation of QTL” at an International Training Course Organized by Dr. Rajeev Varshney of ICRISAT.

Attended **International Conference on Plant Biotechnology for Food Security: New Frontiers** organized by **Society for Plant Biochemistry and Biotechnology** and others at the National Agricultural Science Centre, Pusa, New Delhi, India from February 21-24, 2012. Presented an invited paper “**Biofortification and enhanced bioavailability of grain iron and zinc in wheat using biotechnological interventions**” at the session II on February 22, 2012.

Attended **International Conference –Genomics for Crop Improvement** organized by **DBT and Association of Biotechnology Led Enterprises(ABLE)** at the **Institute of Bioinformatics and Applied Biotechnology, Bangalore** from February 18-20, 2013 and gave an invited lecture on **Progress and prospects of biofortification of wheat for higher grain iron and zinc contents and their enhanced bioavailability.**

Attended **BIRAC 1st Foundation Day & Grand Challenge Meet** Organized by Department of Biotechnology, Govt. India at the India Habitat Centre, Lodi Road, New Delhi from 20-22nd March , 2013 as penalist in the Session III “**Healthy foods through biofortification : Impact on community nutrition**”

Attended the **Sixth meeting of Project monitoring committee of Agri-Biotech Projects under CEIB of DBT** on May 9-13, 2013 at ICRISAT, Hyderabad as the expert member .

Attended Eighth and Ninth meetings of the **Technical Advisory Committee of the Centre of Excellence and Innovation in Biotechnology of DBT on January 17-18 at DBT, New Delhi and July 03, 2013** at the National Institute of Immunology, Aruna Asaf Ali Marg, New Delhi, respectively as the expert member.

Attended Indo-Global Education Summit 2013 at New Delhi.

Attended Diamond Jubilee Function of University Grants Commission on December 28, 2013 at Vigyan Bhawan, New Delhi.

Attended the First meeting of the Theme-wise Expert Committee for monitoring of the research components under NICRA in the theme of Crop Sciences at CRIDA, Hyderabad on March 21, 2014.

Attended 3rd International Conference on Human Values in Higher Education from February 28 –March 2, 2014 at PTU, Kapurthala

Attended National conference “**Science of Omics for Agricultural Productivity: Future Perspectives**” at P. B. Pant University of Agriculture & Technology, Pantnagar from March 4-6, 2014 and delivered an invited lecture” Biofortification of cereals for higher grain micronutrients and their enhanced bioavailability” in the Plenary Session I.

Attended the 5th International Conference on “**Next Generation Genomics & Integrated Breeding for Crop Improvement**” held at ICRISAT, Hyderabad from February 18-20, 2015, Chaired the Session VI: Genomics-Assisted Breeding and also presented a poster “**Characterization of radiation induced precise transfer of genes for high grain micronutrients from non-progenitor *Aegilops* species into wheat through intron-flanking EST-PCR markers**”

Salient Teaching/Research/Extension contributions:

Identified a new species of wild diploid wheat *Triticum urartu* and gathered evidence to implicate *T. urartu* as one of the parents of polyploid wheats.

Developed a biochemical system for the selection of immature haploid embryos and haploid morphogenetic culture of *Zea mays*.

Developed systems for the classification of wild wheats and some *Aegilops* species using anther morphology.

Transferred yellow mosaic virus resistance from *Vigna mungo* and *V.sublobata* to *V.radiata* through interspecific crosses.

Discovered the mode of further development of Karnal bunt of wheat after primary infection.

Developed seven wheat varieties viz., PBS 54, PBW 120, PBW 138, PBW 175, PBW 222, PBW 226 and PBW 299 approved for cultivation in Punjab and North Western Plain Zone of India.

Collected and evaluated more than 14,000 accessions of wild and cultivated wheats and *Aegilops* species for resistance to rusts, powdery mildew, Karnal bunt and abiotic stresses.

Synthesized *T. durum* – *T. monococcum* amphiploids with high yield potential of *T. durum* and resistance to rusts and Karnal bunt of *T. monococcum*.

Transferred resistance to herbicide (Isoproturon) from *Triticum monococcum* to *T. durum*.

Developed a complete monosomic series in a high yielding spring wheat variety WL711.

Discovered that Karnal bunt infected spikes and inoculated leaves and soil produce secondary sporidia in abundance for further infection.

Discovered that hybrid necrosis in wheat was a low temperature phenomenon and could be controlled by growing the hybrids above 28°C degree centigrade.

Developed maize x teosinte hybrids for fodder and transferred BSDM resistance of teosinte to maize.

Discovered a weedy race of *Sesamum indicum* which is resistant to several diseases of sesamum.

Developed all the seven D-genome addition lines in *Triticum durum* using Giemsa C-banding.

Analyzed alien chromosomes carrying resistance to wheat streak mosaic virus and green bug among wheat-*Agropyron* derivatives using C-banding and *in-situ* hybridization.

Induced and screened several morphological, male sterile and endosperm mutants in diploid wheat *T. monococcum*.

Developed facilities for long-term storage of wheat germplasm under natural conditions at Keylong (HP)

Made numerous interspecific and intergeneric crosses and amphiploids involving wheat and *Aegilops* species for transfer of useful variability for biotic and abiotic stresses.

Developed substitution lines of *Aegilops ovata* and *Aegilops triuncialis* in *T. aestivum* carrying resistance to stripe and leaf rusts, powdery mildew and cereal cyst nematodes.

Identified novel HMW-glutenin subunits in the progenitors of wheat, which are being transferred to durum and bread wheats.

Established high degree of polymorphism at the molecular level in diploids wheats through RAPDs and developed RAPD linkage maps in diploid wheats.

Established that the pollen-tube channel cannot be used as for delivery of exogenous DNA to wheat ovules for transformation.

Prepared Status Report of Agroclimatic Zone-II of Punjab and compiled completion report of NARP-Phase-I for Zone II and III of the State.

Guided or in the Advisory Committees of 15 M.Sc. and 20 Ph.D. students.

Taught "Advances in Cytogenetics of crop plants and Advances in Plant Biotechnology" since 1992. Teaching Genetic Engineering, Plant Cell and Tissue Culture and Genomics and Proteomics at IIT Roorkee

Organized more than 16 Regional Kisan Melas, three ZRAC meetings and coordinated Lab-to-Land Programme at RRS, Gurdaspur.

Organized training courses on Micropropagation of ornamental and other plants through tissue culture at the Biotechnology Centre.

Formulated course curricula for postgraduate programme in Biotechnology at B. Tech., M.Sc. and Ph.D. levels in the PAU, IIT Roorkee and Eternal University.

Associated with the development of protocols for micropropagation of ornamental, fruit and field crops, anther,

isolated pollen and protoplast culture in rice, genetic transformation using particle bombardment gun and *Agrobacterium tumefaciens*.

Established molecular cytogenetic and genetic transformation units in the Biotechnology Centre.

Standardized protocol for routine production of haploids using wheat x maize crosses.

Transformed Basmati 370 with Ds transposon using *Agrobacterium tumefaciens* system isolated six Ds insertional mutants of Basmati 370.

Tagged resistance to Karnal bunt of wheat with RAPD, AFLP and microsatellite markers.

Tagged gene(s) for high protein content, seed size and pre-harvest sprouting tolerance in wheat using STMS marker.

Pyramided three genes *xa5*, *xa13* and *Xa21* for bacterial leaf blight resistance into commercial rice variety PR 106 using MAS.

Developed near isogenic lines of wheat variety PBW343 for leaf rust resistance genes *Lr24* and *Lr28* and pyramided them in PBW343 using marker-assisted selection.

Collected landraces of wheat and barley from higher hills of Uttarakhand and found them to be distinct from the pre- and post-green revolution wheat varieties developed and released in India in the 20th century. The land races possess useful variability for micronutrient content, protein profile, grain hardness and resistance against biotic and abiotic stress.

Identified a number S genome containing *Aegilops* species for high iron and zinc content and made several biofortified wheat-*Aegilops* amphiploids.

Identified and mapped several EMS induced brittle culm and dwarf mutants in diploid wheat being used for functional genomics through reverse genetics.

Identified introgressed and catalogued three novel wheat rust resistance genes, *Lr57* and *Yr40* from *Aegilops geniculata* and *Lr58* from *Aegilops triuncialis* which could save losses due to leaf and stripe rusts of wheat worth billion of US dollars across the globe.

Another set of 10 novel genes from other related wild species, introgressed into wheat, are being catalogued which on deployment among wheat cultivars will stabilize world's wheat production.

Transferred novel genes for extreme type of grain hardness and softness from *Aegilops* species into bread wheat highly desirable for bread and biscuit making, respectively.

Cloned and characterized four important genes in Basmati 370 controlling **Polyembryony, gibberellic acid insensitive dwarf, oligoculm, pectin methyl esterase and seedling lethal** using T-DNA insertions.

Molecular marker assisted pyramiding of bacterial blight resistance genes *Xa 21* and *xa13* and the green revolution semidwarfing gene *sd1* in **Dehraduni** basmati variety Type 3.

Wheat-*Ae. kotschyi* and wheat-*Ae. peregrina* introgressive derivatives with more than double the grain iron and zinc content recovered.

Developed wheat-*Ae. longissima* addition and substitution lines with high grain iron and zinc content.

Identified three low phytic acid EMS-induced mutants in *T. monococcum* having enhanced bioavailability of micronutrients iron and zinc proportionate to their phytic acid reduction.

Mapped cereal cyst nematode resistance gene in diploid wheat and introgressed it into cultivated wheat and validated the transfer using linked molecular markers.

Organized a National Symposium “Recent Advances in Biotechnology for Crop Improvement” at the Eternal University, Baru Sahib on July 12, 2014 where more than 200 faculty members and students from various universities in Himachal Pradesh and adjoining states participated.

Research projects implemented successfully.

1. Plant Biotechnology and tissue culture centre, Pb.Govt. 1986-91 to date
2. Cataloguing and pre-breeding of wheat genetic resources, USDA. 1989-90 to 1994-95.
3. Somatic cell, protoplast and anther culture of *Indica* rice, Rockefeller Foundation. 1992-93 to 1996-97.
4. Development of cytoplasmic substitution lines in *Brassica* through protoplast fusion, Department of Biotechnology (GOI), New Delhi, 1989-93.
5. Utilization of alien wheat addition lines resistant against Karnal bunt, powdery mildew and loose smut, ICAR, 4 years.
6. Micropropagation and induction of somaclonal variation in sugarcane, ICAR, 3 years. 1993-96.
7. Construction of RFLP linkage map in *Triticum monococcum* and its utilization in the transfer of disease resistance from related species, DBT. 1994-99.
8. Micropropagation in Citrus and Litchi (*L. chinensis*), NABARD, 1994-95 to 1998-99.
9. *In vitro* techniques for selection of radiation induced mutants adapted to adverse environment conditions, IAEA/FAO. 1994-95 to 1998-99 and 1999-2000.
10. Cataloguing and Molecular tagging of quality traits in bread wheat and related species, DBT. 1995-96 to 1999-2000.
11. Identification and transfer of Novel HMW glutenin subunits from wild *Triticum* and *Aegilops* species for improvement of bread making quality of cultivated wheat ICAR-117, ICAR. 1995-96 to 1997-98.
12. Micropropagation and production of ornamental and other plants, PSCST.
13. Micropropagation of sugarcane. Punjab Govt.
14. Genetic transformation of basmati rice. Rockefeller Foundation. 1996-97 to date.
15. Genetic Engineering of novel herbicide resistance into wheat to provide a less resistance prone replacement to isoproturon CSS-10, DST. 1996-97 to 1998-99 and 1999-2000,

16. Molecular tagging of precise transfer of rust and Karnal bunt resistance from non-progenitor *Aegilops* species into cultivated wheats. USDA. 1998-99 to 2002-04.
17. Karnal Bunt screening of US winter wheats under Indian conditions. USDA 2000-2005
18. Fine mapping and map based cloning of genes of economic importance in diploid wheat, *Triticum monococcum* jointly funded by Indo-Swiss Collaboration in Biotechnology and Department of Biotechnology, India, 2000-2006
19. Pyramiding of leaf rust resistance genes in wheat. NATP-ICAR, 1999-2004.
20. Genetic transformation of sugarcane for insect-pests and disease resistance. DBT, 2000-03.
21. Bioinformatics Center of the PAU. DBT, 1997 to continue.
22. Development of diploid wheat (*Triticum monococcum*) deletion lines for reverse genetics. National Science Foundation, USA, 2005-07.(US\$ 96.8800)
23. Biofortification of wheat for micronutrients through conventional and molecular breeding approaches. DBT. Govt. India. 2006-2011.Rs. 84.34 lakhs
24. Functional Genomics for Validation of Important Candidate Genes for Improvement of Rice. DBT, Govt. India. 2009-2012.(Rs. 59.36 Lakhs)
- 25. Biofortification of wheat for micronutrients through conventional and molecular breeding approaches-Phase II as Co-PI. DBT. Govt. India. 2012-2017. Rs. 109. 304 lakhs at the Eternal University, Baru Sahib, Himachal Pradesh.**

Current Research Activities:

Transfer of useful variability from related species of various crop plants through wide hybridization, molecular cytogenetics, molecular mapping, gene tagging, gene cloning and transformation. Characterization and testing of interspecific derivatives and transgenic plants. Functional genomics of wheat and rice using reverse genetic approaches for cloning of genes of economic importance. Biofortification of wheat for enhanced micronutrient content and bioavailability. Molecular breeding of functional foods of India and bioprospecting of biodiversity of important medicinal plants of Himalayas for their nutraceutical potential.

- Dhaliwal, H. S., N. Rawat, N. Kumari and V. K. Tiwari.2009. Development and characterization of wheat-*Aegilops* amphiploids and interspecific derivatives with high grain iron and zinc content. Presented at the International Wheat Quality Conference-IV Wheat Science Dynamics: Challenges & Opportunities, Saskatoon, Saskatchewan , Canada June 2-6, 2009.p 58.
- Rawat, N., K. Neelam, V. K. Tiwari, G. S. Randhawa and H. S. Dhaliwal.2009. Scanning electron microscope-energy dispersive X ray analysis of phytic acid and minerals and nutritional changes in germinating wheat grains. Presented at the International Wheat Quality Conference-IV Wheat Science Dynamics: Challenges & Opportunities, Saskatoon, Saskatchewan , Canada June 2-6, 2009 p114.
- Tiwari, V. K., K. Neelam, N. Rawat, J. Dahiya, G. S. Randhawa and H. S. Dhaliwal. 2009. Characterization, evaluation and genetic diversity analysis of a set of landraces of wheat from high hilly areas of Himalayan hills of Uttarakhand. Presented at the International Wheat Quality Conference-IV Wheat Science Dynamics: Challenges & Opportunities, Saskatoon, Saskatchewan , Canada June 2-6, 2009 p102.
- Dhaliwal, H. S. 2009. Keeping the Green revolution Evergreen through recent advances of biotechnology. Presented at the Ist Indian Agricultural Scientist and farmers congress: Technological Innovations for Enhancing Agriculture Production. At CCS University of Meerut, October 3-4, 2009. Souvenir & Abstracts. pp 13-23.
- Singh, K., P. Chhuneja, V. K. Tiwari, N. Rawat, K. Neelam, R. Aggarwal, S. Malik, B. Keller and H. S. Dhaliwal. 2010. Mapping of QTL for grain iron and zinc content in diploid A genome wheat and validation of these loci in U and S genomes. Presented at the Plant & Animal Genomes XVIII Conference, San Diego, CA, January 9-13, 2010.
- Sheikh I, Sharma P, Verma S K, Kumar S, Malik S, Singh D, Kumar S, Chugh V, and Dhaliwal H S. Precise transfer of useful variability for high grain micronutrients from wheat-*Aegilops* substitution lines into bread wheat through pollen radiation hybrid approach. Abstract published at Plant and Animal Genome XXIII Conference January 10 - 14, 2015.

Sharma, P., Sheikh I., Singh, D., Chugh V., and Dhaliwal, H S. Precise transfer of useful variability from non-progenitor wild species into wheat cultivars through induced homoeologous chromosome pairing. Poster presented at International Conference, “9th Canadian Plant Biotechnology Conference” McGill University, Montreal, Canada. May 12- 15, 2014.

Sharma, P, Sheikh I., Chugh, V., Singh, D., Dhaliwal, H. S. Iron and Zinc content in leaves and straw of different wheat-*Aegilops* addition and substitution lines. Poster presented at National Conference, “Science of Omics for Agricultural Productivity: Future Perspectives”. GB Pant University of Agri & Tech, Pantnagar. March 4-6, 2014.

Sheikh I., Sharma P, Verma S K, Kumar S, Malik S, Kumar S, Chugh V and Dhaliwal H S. Characterization of radiation induced precise transfer of genes for high grain micronutrients from non-progenitor *Aegilops* species into wheat. Poster presented at 5th International Conference on Next Generation Genomics and Integrated Breeding for Crop Improvement February 18 - 20, 2015 ICRISAT, Hyderabad, India
